

Stephanie takes pride in every quilt, no matter the piece. Small or large, plain or fancy, every piece has her full attention. She works in a clean, smoke-free, in-home studio. Stephanie owns and uses a Handi-Quilter longarm with the Prostitcher computer guidance system for smooth and even stitches. Hand guided quilting is available too!

# IS YOUR QUILT READY?

## TIPS for Best Results

### TOP

---

- Quilt top should be trimmed to final size.
- Top should lay flat. Measure the top, middle and bottom. Measurements should be the same, if not there is a possibility that your finished quilt will not be square or have fullness eased in which can cause puckering.
- Please check to see that your seams are pressed in your desired direction

### BACKING & LOOSE ENDS

---

- Be sure all seams are secure and excess thread is removed along with pins and other embellishments
- Backing and batting must be 4-6" larger than the quilt top on each side
- Do not baste the quilt layers together. These 3 items need to be brought in as separate layers

### QUICK CALCULATIONS

---

Pricing is determined by size and intricacy of the quilting chosen.

Square inches:  $W=58''$   $L=72''$   $58 \times 72 = 4176$  square inches

Linear inches:  $W+L=130 \times 2 = 260$
